1 Introduction

Introduction

Back in June 2005, when the European Defence Agency (EDA) was less than a year old, the topic of standards applicable to Armoured Fighting Vehicles (AFVs) was put forward as a possible Expert Group topic for CEN Workshop 10. This was consistent with the then EDA's Armoured Fighting Vehicles "Flagship Project" which was aimed at reducing fragmentation and moving towards a common European AFV programme. However, the EDA found little real interest from its participating Member States to cooperate on platform systems in the near-term. Instead the focus was shifted to cooperation in sub-systems and components where more potential existed. Cooperation has started in these areas, specifically in Unmanned Ground Tactical Vehicle, Network Enable AFVs and Active Protection. The aim is to provide the future components, technologies, personal networks and stakeholder confidence to commence whole-system collaborations for the next generation of vehicle. Similarly, Expert Group 9 was to provide a common set of standards to enhance the possibilities for whole-system cooperation in the future.

Working period: April 2007 – April 2008

Difficulties: - Availability of latest relevant standards or standards being developed

2 Expert Group 10 Members

Member	Name	Company/MoD
EU (UK)	Mr Neil Pitts	European Defence Agency (EDA), Principal Officier Armaments
DE	Mr Jan Lau	Rheinmetall Landsysteme GmbH, Innovations Manager
DE	Mr Peter BRUHN	Rheinmetall Landsysteme GmbH, Senior Vehicle Test Engineer
DE	Mr Dietmar Kugler	Diehl BGT Defence GmbH & Co.KG, Development engineer
DE	Dr. Torsten Englert (Ing.)	Krauss-Maffei Wegmann GmbH & Co. KG
FR	Mr Bernard Julien	DGA/ETAS/SDP
FR	Mr Loïc Loc'h	NEXTER Systems, Product Safety engineer
FR	Mr Jean-Bernard Senneville	DGA/ETAS/SDP /SCT, Land systems standardization manager
FR	Mr Eric Waringhem	DGA/DET/SDPCT
SE	Mr Hakan Karlsson	BAE SYSTEMS
OCCAR	Mr Mariano Tocchi	OCCAR
TK	Mr Enis Naci Ozkan (Eng.)	ASELSAN A.S (State Company)
TK	Mr Tolga Dursun (Eng.)	ASELSAN A.S (State Company)
FI	Mr Risto Liukkonen	Patria Vehicles Oy, Product Safety Manager, Systems Engineering Manager
EU (GE)	Col. Erich Lang	European Defence Agency (EDA), Assistant Director Armaments

EU (AT)	Maj Alexander Corrieri	European Defence Agency (EDA), Senior Officier for Armaments Cooperation
PL	Lt Col. Marek Szudrowicz (Ph.D.)	Military Institute of Armoured and Automotive Technology Department of Material Evaluations
PL	Lt. Col. Dr Jarostaw Dabrowski	Military Institute of Armoured and Automotive Technology
IT	Magg. Mauro FANZANI	ITALIAN MINISTRY OF DEFENCE
DE	Robert Grieger	BWB – K 52.2

3 Scope

The title of the Expert Group 9 is "Armoured land vehicle technology," which implied a potentially unmanageable scope of work to be complete within the required timescales. Expert Group 9 agreed to limit the scope to locate, evaluate and propose best practice standards, as well as identify gaps in the standards, primarily related to the test and evaluation of future Armoured Fighting Vehicles (tracked and wheeled). Expert Group 9 would then be able build on the work initiated by NATO in 2003, taken on by ITESC in 2005 and continued by Germany in 2006 to update the AVTPs and ITOPs.

4 Selection of standards

Approximately 500 standards have been identified that comprise:

- NATO STANAGs and Allied Publications
- Existing Armoured Vehicle Test Procedures (AVTPs)
- Existing International Test Operations Procedures (ITOPs)
- Civil Standards
- National Defence Standards
- US Military Standards

5 Reduction process

Expert Group 9 was unable to obtain permission to review the most up-to-date AVTPs and ITOPs and therefore unable to progress the agreed scope of work. Nonetheless standards from 9 different AFVs programmes were collected, together with AVTP listings, ITOP listings, and EU Type Approval Directives. These standards and standard-like documents provide a baseline for future work and are contained in the spreadsheet at Reference.

6 Recommendations

The scope of Expert Group 9 should be resurrected when the most up-to-date AVTPs and ITOPs are available for review.

The spreadsheet at the Reference should be made available to Governments and Industry as a listing of possible standards applicable to AFVs.

REQUIREMENTS

12/10/2007

Directives suitabillity on vehicle type approval for motor vehicles and their trailers

Requirements are based on European Union frame directive 70/156/EEC*2001/116/EC Type-approval of motor vehicles and their trailers, special purposed N3G and M3G vehicle class; Armoured vehicles (cross-country truck and bus) COUNCIL DIRECTIVE of the 6th February 1970 on the approximation of the laws of the Member States relating to the type-approval of motor vehicles and their trailers (70/156/EEC). As amended by directives 92/53/EEC, 93/81/EEC, 95/54/EC, 96/27/EC, 96/79/EC, 97/27/EC, 98/14/EC, 2001/116/EC.

Note: Armoured Fighting Vehicles AFV (tracked and wheeled) are not classified to directive vehicle classification cathegory M1 to O4 vehicle. Type approvals directives can use when applicable to AFV
