

## STRATEGIC CONTEXT CASES – INDUSTRY CONSULTATION PORTAL

### - CALL FOR CONTRIBUTIONS -

*PHASE 2 – FOLLOW-UP: [7 January - 15 February 2019](#)*

**Request for additional inputs on:**

- a. Solutions for RPAS Air Traffic Integration in cooperative and non-cooperative environment such as Detect and Avoid solutions, autonomous capabilities for RPAS ATI multiple emergency situations and C2 datalink.
- b. Solutions to increase resilience, confidentiality and cyber security on the communication, navigation and surveillance systems.
- c. Solutions to increase interoperability between military and civil CNS systems.
- d. Solutions to enhance ATM (Air Traffic Management) data information sharing and for common (Civil Military) air situation perception, dealing with increasingly complex, cluttered airspace due to the proliferation of cooperative and non-cooperative air systems (at all altitudes) for military and civilian use.
- e. Solutions for Dynamic Mobile Areas.
