

# European Defence Industry Associations

2016 Catalogue

# Foreword

In the area of Market & Industry the EDA promotes the efficiency and competitiveness of the European Defence Equipment Market (EDEM), strengthening of the European Defence Technological and Industrial Base (EDTIB), and supports government and industrial stakeholders in adapting into the EU regulatory environment.

Further to the development of actions and activities to support its Member States (shareholders), EDA has taken action in favour of the industry. Through different workstrands, EDA has developed a set of activities and tools to support the industry by addressing either supply chain related issues or the specificities of the SMEs. Those activities aim at facilitating the access to EU fundings, the support to Innovation, the access to the European Defence supply Chain and the access to business opportunities.

Those activities could only be thought through and implemented without a comprehensive knowledge and understanding of the Defence Supply Chain in Europe. This EDTIB is made of companies that are so numerous and diverse that EDA had to rely on groupings of those companies to better understand them. The Defence Industry Associations at national and European level are a set of groupings that became one of the main interlocutors of EDA.

This catalogue regroups at the time of its making, the national and European Defence Industry associations and their members and is a good information tool to start exploring for new potential partnerships. The web based tool will be available soon.

## Countries:

Austria  
Belgium  
Bulgaria  
Croatia  
Cyprus  
Czech Republic  
Estonia  
Finland  
France  
Germany
