

I. Workshop on Energy & Environment

22 March 2012
EDA, Brussels

09:00-19:00 – Open Session with industry

Purpose

The purpose of the Workshop is to address the big picture of *Energy and Environment* and what currently is being addressed within EDA. Furthermore, the Workshop is aimed at defining the process for identifying what functions, systems and technologies are specific to Crisis Management and thus will not be covered by developments in the civilian domain. The output will feed into the drafting of a strategy on *Energy and Environment* that addresses actions need to be taken both in the short and long term.

Profile of attendees

The envisaged attendees are civ/mil engineers, researchers and capability experts (including logisticians) in the following fields:

- Energy
- Waste
- Water
- Munitions
- Materials
- Logistics and Supply Chain Management.

Agenda

1. Overview Session (09:00 – 11:30)

- Overview of EDA activities on Energy and Environment
- Presentation on the different work streams as well as individual projects related to Energy and Environment

2. Workshop Session (11:30 – 16:00)

- Establish a common understanding of how Energy and Environmental issues affect Crisis Management and how a common strategy could be beneficial.

- Through syndicate work, define a methodology for identifying what functions, systems and technologies are needed to be addressed in the domain of Crisis Management and are not covered by developments in the civilian sector. The process defined will be implemented in subsequent meetings that will address each area (Energy, Waste, Water, Munitions, Materials and Logistics and Supply Chain Management) separately.

3. EDA update on Energy Supply for Camps (16:00 – 16:45)

- Review of the Forward Operating Bases 2012 Conference held 20-21 March 2012

4. Preparation for the “Military Green” Conference and Demonstration of June 2012 (16:45 – 18h30)

- Harmonization of national and industrial ideas, and requirements for the event
- Identification of possible participation on the conference and demonstration
- Introduction of the planned (future) activities on Operational Energy - Test case
- Industrial participation - Sponsorship
- National contribution - Partnership

II. 5th Progress Meeting Energy Supply for Camps

*23 March 2012
EDA, Brussels*

09:00-13:30 – Government session only

1. Progress Meeting of the Study: Fuel-Dependencies

- Progress review by the contractor, ISDEFE (ES)
- Review of the Questionnaire
- Risk Assessment
- National studies

2. Update on Category B Projects

3. Update of national energy activities

- Developments, Tests and Implementations
- Operational energy initiatives
- Homeland energy plans
